

ACCEPTANCE LETTER NO: Minutes of CWC – I held on 15-09-2023

To
M/s. Ram Electricals
No.1, 3rd Street, KK Nagar,
Thirumullaivoyal,
Chennai – 600 062.

Dear Sirs,

Type of work: Item Rate
Sub: PROVISION OF POLE WITH POST TOP LED LIGHT FITTINGS INSIDE AVNL
CORPORATE OFFICE COMPOUND.

Ref i) Fy Tender No. HVF/CE/13025/CEO/2023-24/29., Dt.13.07.2023.
ii) Your Quotation ID 586336

1. For and on behalf of the President of India, I hereby the acceptance of your tender by the competent financial authority for the above mentioned work for a total value of Rs. 6,23,765.00 (Rupees Six Lakhs Twenty Three Thousand Seven Hundred and Sixty Five Only) and other the services detailed in the schedule enclosed herewith at the item rates quoted by you in Schedule 'A' of the Tender documents as per the terms, conditions and specifications laid therein. List of items, to be issued by factory, is given in Schedule 'B'.

2. The contract is allotted with No. HVF/CE/09/2023-24/Cap., Dt.29-09-2023 which will have to be quoted by you in all future correspondence in connection with this contract.

3. In accordance with condition No. 22 of the General Condition of Contract (IAFW-2249), please submit the security deposit of Rs.16,000.00 (Rupees Sixteen Thousand Only) in favour of "Chief General Manager, Heavy Vehicle Factory Avadi" as mentioned in tender condition.

The maturity date of security Deposit shall be minimum 12 months from date of the completion of contract.

4. The contract shall be governed by the terms and conditions as per the contract agreement enclosed and general condition of contract MES IAFW 2249. The deviation limit shall be as per the clause No. 19.1.1 & 19.1.2 of MES Contract Manual (latest revision)

5. Shri. D.N Sandeep, JWM / EE(Est) is nominated as Engineering-In-Charge and Shri. S.Anandan, CM / EE(Est) is nominated as Site-In-Charge for the subject work.

6. You are requested to contact the Engineer-In-Charge within 7 days of receipt of this letter for taking over of site and to make time and progress chart. You will also maintain wage-cum-muster roll and all other records as required in Contract Labour Rules and Acts.

7. Please acknowledge receipt of this letter and return two copies duly signed by you in proof of acceptance within seven days from the date of receipt of this communication.

JT. GENERAL MANAGER / IMS, EO & GS
For CHIEF GENERAL MANAGER / HVF
For And On Behalf Of THE PRESIDENT OF INDIA

TERMS & CONDITIONS:

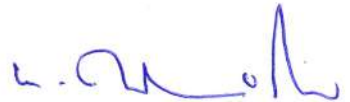

1. Special condition: The material required for the subject work which be brought inside the factory by contractors should be noted along with challan / vouchers etc., and a copy of the same are to given to the engineering office for record and copy to be submitted to the contractors along with the bill while claiming the payment.
2. Payment clause: The contractor has to pay the minimum daily wages to the skilled/semi skilled/unskilled labourers engaged in their work as has been specified by the Government, latest rate and displayed in the wages notice Board at factory.
3. Safety Clause: Annexure-A of MES Safety Code, IAFW2249 must be observed in general, Work permit shall be obtained for overhead/hazardous work condition. All the safety precautions/measures have to be taken by the contractor. However, a few points of safety measures to be followed for working at height and on the roof are mentioned hereby:

Use of safety belt and helmet of proper quality is mandatory for all workers working on roofs at height of above 5.00 meters and also in the underground areas. Safety belt with life line should be properly tied at some firm support in.

- (i) In case any difficulty is faced in proper fastening and securing of safety belt, a safety net may be provided below the work spot so that in case of accident fall, there might not be any fatality.
- (ii) A crawling ladder or roof walker must be used for movement on Asbestos/CGI roofing.
- (iii) Work permit system should be followed in proper spirit. Contractors shall start the work after obtaining the Work permit. Wherever applicable, Contractor's supervisor and site-in-charge should brief on safety precautions to be observed by the workmen before start of the work. The workers should be clearly explained about the danger of standing or sitting on an apparently stout & new and neat looking asbestos/CGI sheet which is intrinsically weak.
- (iv) The contractor shall clear the site after completion of work.
- (v) The contractor must employ the labour force duly insured life risk.
- (vi) The contractors shall ensure compliance of all applicable statutory rules and regulations.

4 DEVIATION CLAUSE:

- (i) $\pm 25\%$ of value of individual item other than freakishly rate quoted items.
- (ii) For freakishly higher or lower rate quoted items it shall be $\pm 5\%$.
- (iii) 20% of work order value (Contract value maximum Rs.10 lakhs)
- (iv) 10% of work order value (Contract value exceeding Rs.10 lakhs)

(K. TULASI RAO)

JT. GENERAL MANAGER / IMS, EO & GS
For CHIEF GENERAL MANAGER / HVF
For And On Behalf Of THE PRESIDENT OF INDIA

ANNEXURE-A

SAFETY POINTS TO BE CONFIRMED AND FOLLOWED BY THE CONTRACTORS:

1	Working with Safety is the responsibility of every worker individually and collectively. The contractor will be fully responsible for safe working at site.
2	Contractors should ensure that workers under his control do not come to work under the influence of intoxicants. Any worker found on duty under the influence of liquor or of intoxicating drugs, will be liable to severe disciplinary action / removal from site.
3	The contractor shall ensure of necessary shut- down where ever there are hazards of gases, electricity, moving machineries etc.. by the executing department & also ensure that these shutdown clearances are taken in writing before sending workers to such locations.
4	Height Pass (Permit for working at heights) and Safety permit must be obtained by the contractor from Safety Section / HVF, before commencement of the work and the same shall be handed over to Engineer In-Charge (EIC).
5	Every worker who is to be deployed for working at height must submit a certificate from a Government Doctor that he has been examined for physical and mental fitness and certified to be fit. This certificate is to be produced every six months. The fitness will include freedom from (1) Epilepsy (2) High BP (3) Obesity (4) Vertigo along with general fitness and good eye sight.
6	The persons engaged by the contractor must have the training certificate of working at heights issued by a reputed institution.
7	All work at height must be carried out under the supervision of an Experienced and Trained Supervisory Team wherein the workers and Supervisory staff are well conversant with use of Personnel Protective Equipments (PPE's).
8	There must be one supervisor to exclusively monitor the activities of workers at the roof to ensure that all people are adhering to all safety precautions like laying of net at top of roof, safety belt and fall arrestor tied with lifeline in addition to the supervisor at ground work spot.
9	List of PPEs proposed to be used along with Test Certificate of the same must be submitted by the Contractor to EIC before start of work.
10	The safety of Men and Material is the entire responsibility of the Contractor. The Workers must limit their movement to the designated work areas and not loiter around.
11	The contractor must take Insurance policy for workman covering workman's compensation act and submit the copy of the same to EIC before commencement of work.
12	The Contractor should commence the work only after clearance for starting the work is given by EIC / SIC / Safety Section representative / User Section representative / Service section representative (if involved) in writing after ensuring compliance of all safety instructions, safe work conditions and regulations. It must be ensured that all safety requirements like use of Safety belts, full body harness, Life line Protection, Helmets, Safety nets etc.. in place and ready to be used by their labours.
13	The Contractor must use BOOM lift for Climbing up / down from heights.
14	Before Commencement of work at height all moving equipments under roof sheet where work is to be carried out shall be shut.
15	Workers should be conversant with the use of Retractable fall arrestor, life line, safe work ladder, duck ladder, crawling board , Helmets etc., The work of fixing safety net must be carried out by experienced person and precaution be taken so that net is fixed to a structural member sufficiently strong to bear at least one ton load and on sagging under the load of fall the net must not strike a machine structure or part of building or crane.
16	Ladders, if used, must have a nylon rope for tying on top and bottom with suitable self locking hooks, screws, rings etc.,
17	Use of Anchor plates to fix the lifeline etc must be done wherever necessary / feasible
18	In case the site conditions demands, a Safety Net may be fixed firmly on the fragile roof with the help of J-Bolts and this must be used for taking a life line. Proper training for the above must be imparted by the contractor to workers working on fragile roof and in any case fragile roof must not be taken for granted as safe.

19	During climbing on roof or on electrical pole using ladder or otherwise precautions must be taken to use two self locking hooks with lifelines and as climbing these hooks should be alternatively attached and detached with the cross bars / foot bars to prevent any eventual fall due to slippage. After reaching the roof of the top end of the ladder must be tied to the pole / fixed structure on top of the roof and work should be started thereafter.
20	The workers working at height must be cautioned not to allow leaving of loose items like broken sheets over the roof after completion of work.
21	Before starting the work, the area of work at height must be clearly defined and accordingly safety net of sufficient size should be put covering an area of 2.5 meters beyond the working area on all sides. The area of work at height and the approach also to be earmarked. The workers must specifically follow the specified route to reach the work area. If approach route is not firm than appropriate PPE as mentioned above must be used to ensure safety at work.
22	The Engineer in-charge executing the contract upon his satisfaction that the Contractor is not performing as per the safety requirements may direct stoppage of work. The contractor shall not proceed with the work until he has complied with such directions to the satisfaction of concerned Engineer in-charge.
23	On getting a Verbal intimation from Safety Section representatives / User Section representative regarding in any lapses in safety by the Contractor or his workers, the work should be stopped immediately. The verbal intimation must be followed up with written statement to civil section (Executing Section). After receiving the written statement from above representative, the EIC may pass orders wherein the contractor shall be liable for penalty of Rs.5000/- for the first violation, Rs. 10000/- for the second violation and Rs. 20000 /- for the Third Violation. For the Fourth violation his contract shall be liable cancelled and to be debarred from further contracts. The penalty / fine amounts will have to be deposited by Contractor in the form of MRO and the MRO will be handed over by the contractor to the EIC.
24	Suitable scaffolding should be provided for workmen for all works that cannot be safely be done from the ground or from solid construction.
25	While standing on the valley gutter, the safety belt should be worn and the life line should be tied to the purlin of the adjacent bay
26	In case the Contractor need to engage material handling equipments from outside, the following documents are required to be submitted to HVF without fail ; a. Competent person certificate issued by Competent Person approved by the Directorate of Industrial Safety and health. b. Registration certificate of the equipments c. Lifting tackles like wire rope, slings are also to be certified by the Competent person as they are part of the lifting material handling equipments. d. The valid driving licenses of the driver who operates the material handling equipments.

**NAME OF THE WORK : PROVISION OF POLE WITH POST TOP LED LIGHT FITTINGS INSIDE AVNL
CORPORATE OFFICE COMPOUND**

GENERAL SPECIFICATIONS

1. Sand : Fine aggregate for concrete work shall conform to materials specifications and grading within the limits of grading zones II or III all as specified in clauses 4.4 to 4.4.7.3 of MES Schedule Part-I. Contractor may without any extra cost in lieu of river sand use manufactured sand (crushed stone sand) produced from hard granite/basalt/black trap stone, having cubical shaped particles with grounded edges of ground gradation zone II / III as per IS 383 – 1970 as applicable. In the market it is known as M-sand / Robo sand / I-sand etc. For pricing deviations, SSR rates shall only be applicable without any price adjustment for manufactured sand. However manufactured sand shall be used only in concrete, Cushioning and masonry works. For plastering, river sand shall only be used.
2. The brick to be used for the work shall be of well burnt, good quality bricks free from cracks, flaws, wraps and nodules of free lime and shall be of uniform sizes and shape.
3. The aggregates to be used for the concrete shall be of black or blue hard granite aggregate free from quarry dust, earth etc. The size of the aggregate shall be of uniform size as per the requirement. Flaky & elongated pieces over sizes shall be avoided.
4. The cement to be used shall be of OPC (Ordinary Portland Cement) of 43 Grade and 53 grade in accordance with IS8112-1989 only of **The Associated Cement Companies Ltd.**, Grasim Industries Ltd, Ultra Tech Cement, The India Cement, Dalmia Cement, Andhra cement Ltd., Century Cements, Saurashtra Cement, Madras Cement, Mangalam Cement, Birla Cement, Orient Cement, Lafarge Cement, Shree Cement, J.K. Cement, Jaypee Rewa Cement, Binani Cement, Lakshmi cement, Gujrat Ambuja Cement and . Bangur Cement , age not more than six months from date of manufacture.
5. All the Mass concrete work should be of Ready Mix Concrete (RMC). RMC shall be procured by the contractor from the producers whose RMC plants are fully Automatic plants and conform to the IS 4926-2003 and IS 4925-2004.
6. The concrete test certificate for samples taken at RMC plant should be submitted to E-I-C.
7. The contractor should cast 3 Nos. of concrete cube per 200 CUM of concrete at site. The testing of concrete cubes to be done by the contractor at his own cost at government approved testing lab. The relevant test certificate should be submitted to E-I-C
8. All the cement works shall be cured for at least 21 Days.
9. The normal concrete shall be of machine mixed and no manual mixing shall be allowed and the materials required for the concrete and the cement work shall be measured by means of weigh batching/ measurement boxes only as directed by E-I-C and no other mode of measurement shall be allowed.
10. All the concrete work shall be compacted using mechanical vibrator or surface vibrator as required.
11. The tiles for the work to be used shall be of JHONSON / KAJARIA / NITCO make
12. The Structural Steel to be used shall be of RINL – VIZAG Steel / SAIL / TATA – TISCON / " BIS" Marked Primary manufacturers.
13. The primer to be used on steel and wooden surface must be of first quality ASIAN / NEROLAC / BERGER make only
14. The enamel paint / External Emulsion / Internal Emulsion / OBD to be used must be first quality ASIAN / NEROLAC / BERGER make only. The Cement Paint to be used must be first quality SUPERCEM / DUROCEM / SNOWCEM
15. All the materials must be approved by E-I-C before incorporation into the work and shall have ISI / BIS Mark.
16. All Sanitary fitting make shall be of Make – Parryware / Hindware / Nycer / Johnson
17. Wherever make of any item is specifically mentioned in the description of the BOQ Items, the items/material of that specified make must be supplied/fixed by the contractor with the approval of E-I-C

GENERAL CONDITIONS

- 1 All the works are to be carried out as per the Standard Procedure laid in SSR '2009 Part-I
- 2 All the materials, tools etc., required for the work shall be the responsibility of the Contractor.
- 3 The safety of men and materials shall be the responsibility of the contractor. CGM/HVF will not have any responsibility in this account.. The contractor will be solely responsible for any accidents occurring during execution of the work.
- 4 All the materials shall be got approved by E-I-C before incorporation into the work and shall have ISI Mark. Original cash vouchers of materials purchased and used by contractor on the work shall be submitted to EIC/ Site in-charge for record. Inward gate pass of all materials being brought by contractor are to be made on a pucca bound register and got it checked along with cash vouchers from the E-I-C/Site-In-Charge at the time of its entry in the Factory/Estate.

- 5 The contractor should take Workmen compensation, Insurance Policy as per Workmans Compensation Act for the workers in this work and copies of the same shall be handed over to E-I-C before commencement of the work. Further, in case of the death of the contractor person, the contractor will have to arrange for the compensatory payment after meeting the legal heir of the deceased and obtain the necessary acknowledgement for having made the payment. A copy of the same should be submitted to the Principal employer (CGM) within 30 days of the accident. If any failure in this regard happens on the contractors part, the recovery of the amount shall be arranged from the contractors bill.
- 6 The entire work shall be carried out as per the relevant clauses/ specifications of **MES SSR 2020 and SOP for Civil Works in AVNL – 2021.**
- 7 The contract period shall be **'THREE MONTHS' (90 DAYS)** from the date of handing over the site.
- 8 The maintenance period shall be **'TWELVE MONTHS'** from the date of completion of the work.
- 9 The contractor may visit the site before quoting their rates with prior appointment with Divisional Officers of CE / EE
- 10 The safety norms shall be strictly followed and any deviation will lead to cancellation of the contract agreement.
- 11 All the workmen should confine to their work spot only and should not venture into areas other than the work spot.
- 12 The work shall be completed within the stipulated period, failing which liquidity damages shall be deducted from the Contract amount as per **IAFW 2249 and SOP for Civil Works in AVNL - 2021**
- 13 Any damages to Government property, shall be made good free of cost by the contractor
- 14 The dismantled materials except credit item if any shall be returned to CE / EE stores intact.
- 15 The order is for complete work and on completion of the job; the work shall be jointly inspected by the Contractor and CE / EE representatives.
- 16 Adequate safety precautions are to be adopted by the Contractor while working at height such as i) Safety Helmets to all the personnel, ii) Roof ladder shall be arranged for roof work, iii) Full Body harness safety belt shall be arranged for the workmen, iv) Retractable fall arrestor to be arranged by the contractor's workmen working at height, v) Life line to be arranged for the personnel working at height, vi) Safety net to be tied as per safety norms.
- 17 Safety permit shall be obtained by the contractor from safety section /HVF before commencement of the subject work and same shall be handed over to EIC.
- 18 The contractor shall engage skilled labourers only, for the works such as Roof Work, Masonry, plumbing, plastering, Painting and electrical works etc.
- 19 The contractor shall engage a qualified site supervisor and his relevant qualification certificate shall be produced before commencement of work to E-I-C to maintain all the relevant records and documents.
- 20 All Xerox copies of material pass in slips shall be handed over to CE / EE
- 21 The demolished debris shall be disposed off from the site as per the directions of E-I-C
- 22 The Labours to be employed for roof work shall be insured and the copy of the insurance shall be handed over to the Engineer-In-Charge before the commencement of work.
- 23 The order is for complete work and any minor material/minor civil work required for completing the work is deemed to have been included in the quotation, if not specifically stated otherwise.
- 24 The contractor must submit the Certificates / documentations obtained from the Original Manufacturer / Authorised Dealers to prove the genuineness / Authenticity of the branded - materials / chemicals / products being supplied / used during execution as per scope of work of the Contract Agreement. These documents must be submitted to E-I-C before using the materials.
- 25 In view of the safety of Man and Materials, the Contractor is advised to use Boom Lift for doing all the work involving working at height including all types of roof works, under the roof works and roof related works.
- 26 The contractor are advised to visit the work site with prior permission of Divisional Officers of CE / EE for inspection of the site for seeing the suitability of Using Boom Lift for all types of work involving working at height including all types of roof works, under the roof works and roof related works.

ELECTRICAL PARTICULAR SPECIFICATION

- 1 All the materials shall be got approved before incorporation into the work from E-I-C.
- 2 The material used should conform to relevant I.S specification with ISI mark.
- 3 Wiring work should confirm to IS 732 code of practice for electrical wiring installations.
- 4 Wiring should be done block wise and shall be completed in all respect so as to restore the supply in the evening.
- 5 Earthing work should confirm to IS 3043 strictly.
- 6 All steel parts should be painted with one coat of red oxide and two coats of synthetic enamel/ aluminum paint as directed.

- 7 All nuts, bolts, screws etc., used for the works will be galvanized/cadmium plated.
- 8 On completion of work, the contractor should carry out all the tests and submit all the documents (IR & ER values) specified including drawing/layout of the work done.
- 9 The work is for complete work and any minor material/minor civil work required for completing the work is deemed to have been included in the quotation, if not specifically stated otherwise.
- 10 While selecting concealed boxes of sun mica top sheet sizes should be 90x90mm, 130x130mm, 130x180mm or 230x330mm and box depth to be maintained 65mm (minimum). Box should have proper fixing arrangement for earth lid and sun mica top.
- 11 The Contactor shall take shut down with the knowledge of Concerned Shop and deploy their workmen. All safety precautions shall be taken while working.

(K. TULASI RAO)
