3. The bidders have submitted representation towards technical evaluation (copy enclosed at Annex-II). The representations are examined and necessary corrections / decisions have been made by the Evaluation Committee which is enclosed at Annex-I.

4. **Other representations:** A complaint was received from Shri Dinesh Kumar Tiwari vide email dated 01.03.2025 wherein various discrepancies in the technical evaluation were alleged. The same was forwarded to the concerned bidders who have submitted their response on the complaint. A similar complaint was also received from M/s Pioneer Infra Consultants Pvt. Ltd. regarding discrepancies in CVs of other bidders. Copy of the complaint and response received from the bidder is enclosed at Annex-III.

4.1 Evaluation Committee observed that the complaint is mainly related to the mismatch of work experience as claimed by the personnel in their CV against the experience of work as mentioned by the respective client firms. In response to the complaint, the bidders have stated that the CVs are already verified on Infracon and it is not possible to verify each experience from their client firms. Committee took note of the submission made by the bidders and decided to consider the CVs as verified on Infracon since it is not possible to counter-verify each experience certificate, unless *prima-facie* there is any evident misrepresentation in the CV.

4.2 Also complaint is received against M/s EKAM Venture that the bidder has not uploaded the projects shown in Experience in DPR / Feasibility Study cum Preliminary Design Report on INFRACON portal. In response, the bidder has stated technical issues while uploading experience details on INFRACON Portal and enclosed supporting documents. However, experience certificates are submitted in the bid which may be verified separately from the respective clients. Evaluation Committee considered the DPR works completed recently as per experience certificate submitted in the bid.

5. Accordingly, the revised technical score of responsive firms was found as under:
