

Corrigendum on Correction of Technical Evaluation Status in CPP Portal

With reference to the ongoing tender for Baggage Wrapping Facility E-bid no – 2025_AAI_233692_1 on the CPP Portal, three bids were received in response to the tender.

As part of the technical evaluation process, the bids were examined in accordance with the terms and conditions of the NIT. Based on the evaluation, only two bidders were found to be technically qualified, while one bidder was rejected on technical grounds due to non-compliance with the stipulated requirements of the NIT.

However, upon review of the summary displayed on the CPP Portal, it has been observed that the portal reflects all three bidders as technically accepted/qualified for the next stage. This status is not consistent with the outcome of the technical evaluation as per the evaluation records.

In view of the above discrepancy, necessary action may be taken to revert the tender to the technical evaluation stage in the CPP Portal for correction of the status, so as to ensure that only the technically qualified bidders are considered for the financial bid opening.
