

This retender is being issued as the initial tender process did not meet the minimum required number of bids, as stipulated in the procurement guidelines. The lack of sufficient competitive responses necessitates a reissuance to ensure a fair, transparent, and value-driven procurement process.

All interested and eligible bidders are invited to submit their proposals in accordance with the revised tender timeline and conditions. The retender aims to encourage broader participation, enhance competitive pricing, and secure optimal solutions aligned with the project requirements.

Prospective bidders are encouraged to review the tender documents carefully and submit their bids before the new closing date. Any queries or clarifications should be directed to the designated procurement contact within the specified query period.
